Hi guys -

As I mentioned in an email last week, I'd like to give the group an overview of the Recontamination model I've been working with, and the outcomes of a variety of scenarios. I'll have materials ready to send out by COB Tuesday, if not before.

Am I on for Wed? Do you want a preview? I'm pretty open on Tuesday if you do. So far, my results suggest that PCBs are not a recon issue but BEHP could be. Tomorrow I'm planning to run the model for a metal, probably zinc - but if you have any other COI you'd prefer me to focus on let me know.

Karen
